TIMETRAX™ Sync
Synchronized Clock Systems

EDUCATION
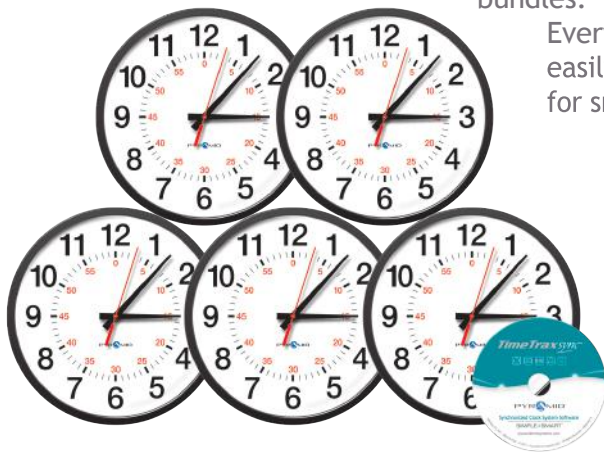

SIMPLE : SMART®

PYRAMID™

Build a system.

No need to break the budget. You can start synchronizing your facility with TimeTrax Sync™ Starter Packs. Each bundle comes equipped with five clocks, communication device and/or TimeTrax Sync™ software. Take your pick from analog or digital clock bundles.

Every system is simple to setup and easily expandable. It's the perfect fit for small facilities or retrofit projects.

Analog & digital clock bundles available.
RF Wireless bundle includes one transmitter with up to 250,000 sq. ft. signal coverage.

TIMETRAX™ Sync
Synchronized Clock
Starter Packs

TIMETRAX™ Sync

Every clock system uses TimeTrax™ Sync software to point to an accurate, dependable NTP (National Time Protocol) time source and supports an unlimited number of analog or digital wall clocks.

WiFi Wireless
TimeTrax™ Sync WiFi Clock System transmits reliable time using a standard internet connection.

Power over Ethernet
TimeTrax™ Sync PoE Clock System harnesses the cost effectiveness of Power over Ethernet to continuously transmit a reliable time signal over Ethernet cabling.

Radio Frequency Wireless
TimeTrax™ Sync Wireless RF Transmitters use wireless frequency-hopping technology to continuously transmit a reliable time signal.

Optimize.

Improve security, promote efficiency and eliminate facility maintenance costs in the educational environment with precisely synchronized clocks.

School districts and college campuses require a highly visible accurate time source. Synchronized time is essential to managing arrival times, lunches, departure times, class changes, standardized testing and bus waves.

Pyramid TimeTrax™ Sync Clock Systems automatically maintain accurate synchronized time between the district office, main office, general areas, classrooms, district or campus-wide.

DISTRICT OFFICE   **MAIN OFFICE**   **CAFETERIA**

Improves security.

Promotes efficiency.

- Improves student & faculty accountability & punctuality

- Integrates with Tone, Bell & Time Clock Systems

- Count Up/Down Digital Timer provides uniformity during timed testing

- **NTP** Provides unobstructed time signal from standard NTP time source

GYMNASIUM

CLASSROOMS

TEST F[
Chapters

Eliminates maintenance costs.

Standardizes class changes, bus waves & extracurricular activities

Synchronizes time between district office, main office, general areas, classrooms, district or campus-wide

Automatically adjusts for Daylight Savings Time & power outages

**Eliminates wired installs (Power over Ethernet & battery operated systems)**

Energy efficient power sources

Recommendation: Use 12-Hour analog clocks with seconds in classrooms, premium wood frame 12-Hour analog clocks in office areas, and dual analog clock wall brackets in hallways and large open areas. Use 6-digit count up/down digital timers for testing and sporting events.
Accessorize with wire guards to protect clocks in high damage-potential areas such as gymnasiums.

Synchronize & save.

Maintaining accurate synchronized time throughout an entire facility saves thousands of dollars in labor, maintenance & lost productivity costs.

Pyramid Time Systems empowers organizations worldwide with easy to use, intuitive Synchronized Clock Systems. Our products are designed to optimize productivity, streamline processes, promote efficient operations, & harmonize the education environment with consistently synchronized time. TimeTrax™ Sync WiFi, Power over Ethernet & RF Wireless Clock Systems are simple to install, easy to expand, & require minimal maintenance.
